Genesis Audio is:

Home Theater

Home Media

Home Control

Today we have the ability to re-create the true experience of "going to the movies" in the comfort of your own home. Utilizing the latest technologies, we can generate truly amazing picture and sound quality on a grand scale.

Whether used for your own pleasure or for entertaining, a dedicated home theater can bring years of enjoyment to you and your family and create a magical space in the home for everyone.

We're different. One of the many ways in which we're different is the scope of what we do. We specialize in home entertainment. That's all we do. No other company in the region can offer you greater product selection, audio-video performance, room acoustics or more knowledgeable and experienced staff than Genesis Audio Ltd.

Visit our showroom in Gahanna and experience just how good home entertainment can be.

Today, media is fluid and your music and video can be networked through the home to serve the entire family. New technologies and wiring solutions allow you to enjoy your TV show, movie or music regardless of format or origin, from anywhere in the home. Enjoy music while entertaining with friends in the kitchen or watch college football in the downstairs bar. You don't have to miss a thing...

We're living in the 21st century. Confusing, poorly engineered remote controls of the past are simply inadequate.

To access the full capabilities of today's digital media choices, a new level of control is essential. Frustration with technology is a relic from a clumsier past... Our control solutions have everyone saying... "How easy was that!"
